Evolve Rainscreen 1/8”

A Drainage and Ventilation Mat

Description:

Evolve Rainscreen is a nominal 0.13-inch, geometric patterned drainage and ventilation mat

It is designed to eliminate moisture and moisture vapor within various wall systems. Evolve Rainscreen is produced from an extruded polymer matrix of tangled monofilaments. The three-dimensional mat is heat-laminated to a non-woven lightweight, breathable fabric in order to provide a separation from various wall systems. The monofilaments are heat-welded at the junctions to form a structure that spaces exterior veneer away from the inner sheathing. The product is useful in cavity wall designs and rainscreen systems in which an airspace is needed for drainage and ventilation.
